Everblooming HYBRID TEA Roses

BARGAIN No. 4011C

CRIMSON GLORY
ECLIPSE

THE DOCTOR
K.A. VICTORIA

PRESIDENT HOOVER

All 5 Roses for only

\$3.99
Postpaid

CRIMSON GLORY. 4002C. Well formed flowers of an intense deep vivid crimson shaded oxblood-red and mellowed by a soft velvety nap. Produced in abundance.

ECLIPSE. 4016C. The slim tapering buds open into brilliant golden yellow 3 to 4 inch blooms. Blooms almost continuously.

PRESIDENT HOOVER. 4018C. A glorious combination of cerise-toned orange scarlet and yellow. Long, reddish buds; flame and yellow flowers. Richly fragrant and free-flowering. Blooms on long stems.

THE DOCTOR. 4006C. The buds are long and pointed, opening to enormous blooms of rich pink. Fragrance is excellent. Handsome, clean foliage.

POINSETTIA. 4010C. A true poinsettia-red of velvety texture and non-fading color. A continuous blooming variety.

K. A. VICTORIA. 4014C. Lovely snow-white buds open to magnificent high-centered, fully double flowers of pure ivory white.

BETTY UPRICHARD. 4012C. A large bicolor rose with rolled petal edges. Petals are carmine outside and a silvery salmon pink on the inside. A fine garden plant that blooms freely all season long.

EDITOR MC FARLAND. 4008C. Richly fragrant flowers of clear, brilliant pink. Perfect in form and remarkably long lasting. One of the best for cut flowers.

TALISMAN. 4004C. Brilliant red and gold buds, opening to enormous well-shaped blooms of scarlet-orange and rich yellow. Constantly in bloom.

MC GREY'S SCARLET. 4020C. Huge, high-centered blooms of a dazzling scarlet red. A vigorous grower producing a continuous succession of fragrant, long-lasting flowers.

EMLONG NURSERIES ANNUAL PLANTING TIME SALE

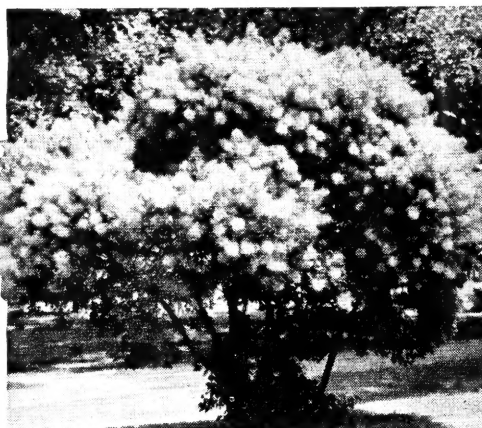

COLORFUL

Flowering Shrubs

PURPLE FRINGE SMOKE TREE

1398C. Clusters of misty purple flowers make this tree-like shrub resemble a great "puff of smoke" when in bloom. Grows 6 to 8 feet tall and may be trimmed to a single trunk if desired. It is sure to dominate the whole scene when in full bloom in late spring and summer. The purplish, misty-looking flowers are long lasting and make a strikingly beautiful display. Marvelous for background planting and as individual specimens. For foliage and flowers, this is the most striking shrub.

HYDRANGEA A. G.

1370C. Produces large panicles of pure white flowers in great abundance from midsummer through fall. Bushes 4 to 5 feet tall and are extremely hardy. Will thrive in both sun or shade. Large, bright green leaves are attractive from spring until frost. An ideal shrub for that shady foundation planting or shrub border.

RED BARK DOGWOOD

1454C. One of the most popular of flowering shrubs. Masses of tiny white florets grouped into large, flat clusters of flower heads are followed in late summer and fall by clusters of blue-black berries. Bright, glossy red-barked twigs are especially showy throughout the winter. Glossy green foliage turns crimson in the fall. Grows 6 to 8 feet tall.

WHITE SNOWBERRY

1404C. Large clusters of attractive, waxy white berries remain on the shrub through most of the winter. Produces lovely pinkish white flowers during late spring. Lustrous dark green foliage. Grows 4 to 5 feet tall and will thrive most anywhere. Does exceptionally well in shady areas. Very showy and succeeds anywhere.

PINK TARTARIAN HONEYSUCKLE

1362C. Pink Tartarian is the vigorous growing shrub form Honeysuckle with the showy pink blossoms. It blooms in great profusion in spring, and is followed by loads of brilliant red berries in fall. Grows 6 to 8 feet tall, but may be trimmed to any desired height. A very showy shrub that will provide a spot of color wherever planted.

PUSSY WILLOW

1452C. This is the large, French Pussy Willow with fuzzy grey catkins with a pinkish cast. A welcome sight in early spring. A tall growing shrub, hardy anywhere. Attractive green leaves.

CALYCANTHUS

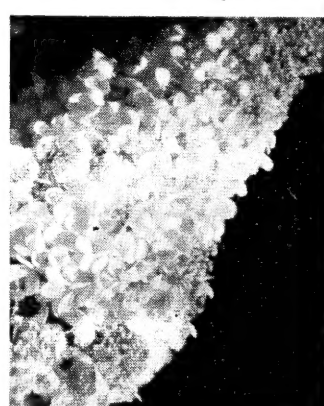

1340C. Commonly called Sweet Shrub. Quite an unusual and different shrub in appearance with its large, curly, dark brown flowers and big, deeply veined green leaves. Flowers have a very pleasing, spicy scent. A low-pleasing shrub, fine for border and terrace.

FORSYTHIA

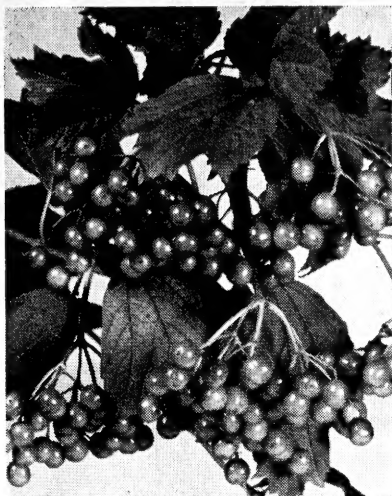

1360C. (Spring Glory) A necessity in any landscaping plan, for the bright, cheerful color it brings to the early spring landscape. Small, golden yellow, bell-like flowers cover the branches in early spring, followed by bright green, glossy foliage. Tall growing; may be trimmed to desired shapes.

HYDRANGEA P. G.

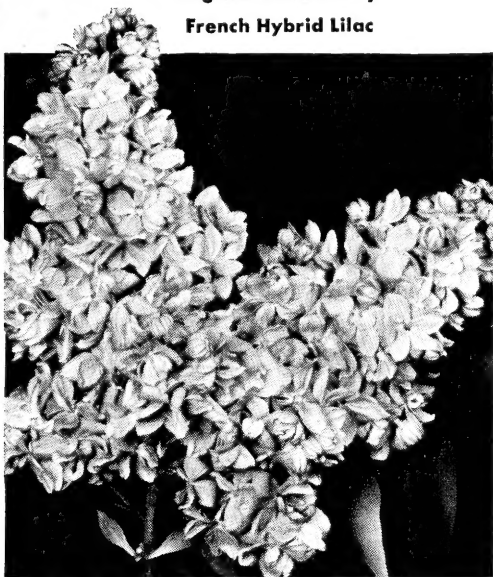

1372C. Showy, pinkish-white blossoms form large panicles 6 to 10 inches long and almost as wide. Blooms deepen to a rose shade in the fall, and dry right on the bush. Grows 5 to 6 feet tall. Fine for cutting, lasting a long time. Hardy anywhere.

EMLONG NURSERIES ANNUAL PLANTING TIME SALE

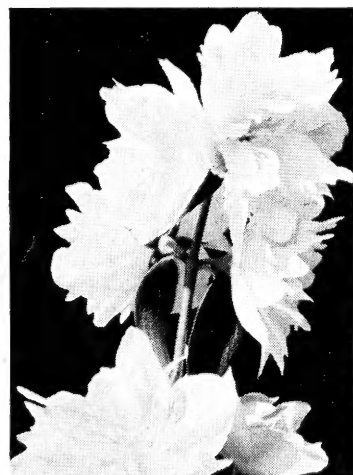

Highbush Cranberry
French Hybrid Lilac

DOUBLE MOCK ORANGE

(Virginalis Snowflake). **1420C.** Lovely double and semi-double flowers, pure white with golden stamens, are borne in large clusters; have a delightful delicate fragrance. Blooms freely in June and July and occasionally thereafter. Shrub grows 6 feet tall; good upright habit; thrives in sun or partial shade, ordinary soil and moisture. Bright green foliage. May be trimmed as desired.

FRENCH HYBRID LILACS

These gorgeous French-type Hybrid Lilacs will add lasting beauty and distinction to your landscape planting. They bear remarkably large flower panicles, 8 to 10 inches long, thickly massed with single and double florets, and richly fragrant. French Lilacs make compact, shapely bushes. They do not sucker from the root like the old fashioned Lilac. They will bear loads of flowers every spring. Desirable for lawn specimens, etc. Plant 5 ft. apart; trim as desired. They will grow 6 to 8 ft. tall. **Colors: 1384C, red; 1386C, white; 1380C, blue; 1382C, pink.**

WAYFARING TREE

(Viburnum Lantana). **1419C.** A vigorous growing shrub suitable for specimen planting. Grows 10 to 15 feet in height and has distinctive dark green, wrinkled leaves that are a lighter grey green beneath. Its flower clusters are white in spring, followed by clusters of red berries that turn black later in the fall. Very attractive in all seasons.

| 2-3 ft. | 1.79 | 3.29 | 5.98 |

RHODODENDRONS

1394C. These hybrid varieties will provide a luxurious appearance when matured. Foliage is large, rich, glossy green and stays that way the year around. We cannot guarantee color of bloom, since these are hybrids, but shadings run from pink through the lavender shades to deep rose. They will thrive in full sun or shade. They are easy to grow, but do require an acid soil. Perfectly adaptable for use in most sections of the country for landscape work and foundation plantings.

| Postpaid | Each | 2 | 4 |

Pink Honeysuckle

Persian Lilac

White Snowberry

• 4 • Red Bark Dogwood

Here is a rare opportunity for budget-minded homemakers to have a complete planting of colorful shrubs at very little cost. These Shrubs are priced so low you can afford to have all you need right now. They are 1-year old, strong, thrifty and rapid growing. Why wait years to finish your planting? Plant shrubs this spring.

PINK TARTARIAN HONEYSUCKLE. 3830C. Pink Tartarian is the shrub form Honeysuckle with flowers much larger and brighter in color than other varieties. A profusion of bright pink blossoms in spring, followed by loads of brilliant red berries in fall. Grows 6 to 8 feet tall.

CALYCANTHUS. 3838C. Delightful, spicy scented flowers with curly, mahogany-brown petals. Large, deeply veined, green leaves. Grows 4 to 5 feet tall. Ideal for terrace and in front of the shrub border.

PERSIAN LILAC. 3832C. A finer twigged, finer textured variety than the old fashioned Lilac with slender, arching branches tipped with beautiful panicles of purple flowers. Makes a beautiful screen hedge plant when planted 2 to 3 feet apart and trimmed as desired.

MOCK ORANGE. (Philadelphus Grandiflora) 3848C. A hardy vigorous growing shrub growing to 8 to 10 feet high. Blooms in June are large, white and fragrant. Blossoms are produced in large graceful sprays excellent for bouquets. Very free flowering.

WHITE SNOWBERRY. 3834C. Large clusters of attractive waxy white berries remain on branches most of the winter. Produces lovely pinkish white flowers in late spring. Lustrous green foliage. Grows 3 to 4 feet in height and does exceptionally well in shade.

FORSYTHIA SPECTABILIS. 3840C. Bright golden-yellow, tiny four-petaled flowers. The earliest to bloom in the spring. Tall growing, fine for background and shrub border plantings. This cheerful yellow color is a welcome sight in spring.

RED BARK DOGWOOD. 3836C. One of the most popular of flowering shrubs. Masses of tiny white florets grouped into large, flat clusters of flower heads which are followed in late summer and fall by clusters of blue-black berries. Bright, glossy red-barked twigs are especially showy throughout the winter. Glossy green foliage turns crimson in the fall. Grows 6 to 8 ft. tall.

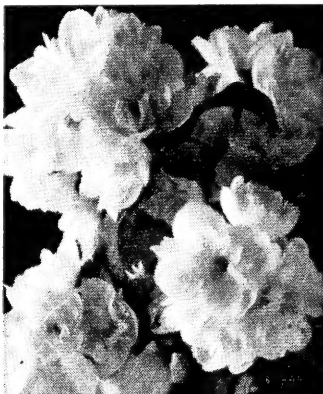

HYDRANGEA P. G. 3842C. Delicate pinkish-white blooms, turning rose color in the fall. Flower panicles 6 to 10 inches long and almost as wide. Grows 5 to 6 feet tall. Ideal for groups and borders.

ABELIA GRANDIFLORA. 3844C. A beautiful shrub that remains attractive most of the year. Dainty, bell-shaped, pink and white flowers bloom from spring until frost. Foliage is a glossy texture and almost evergreen.

WEIGELA ROSEA. 3846C. Large trumpet-shaped flowers of rose pink are thickly clustered on the branches in May and June. Foliage is rich deep green. Fine tall growing shrub for border or hedge.

Now You Can Raise The All-America

Gladiolus Selections

In Your Own Garden!

These four new varieties were selected by the gladiolus experts of America, and are the final selections after having been fairly and thoroughly tested in 30 trial gardens representing all sections of the United States and in Canada. These four varieties are the first to bear the All-American title. They are easy to grow in any garden soil anywhere in the country. These varieties won this distinction because of the following reasons: Beauty of color, flower opening, size of spike, and vigor. Bulbs of these 4 varieties are sold only in polyethylene bags, one bulb to a bag. The variety name, color, patent number, description, originator's name, and complete cultural directions are printed on the bag label. All flower growers can enjoy these outstanding glads at our popular prices.

MAYTIME (P.A.F.) 2648C. Gracefully ruffled deep, pure pink florets with contrasty large white throats. Maytime is a lithesome glad of good height. It readily opens 8 to 10 florets on spikes five and one-half feet tall. A robust grower, having wonderful plant health and makes fine, plump bulbs. You will love Maytime for the silky taffeta sheen of its petals and remarkable ease of growth.

APPLEBLOSSOM (P.A.F.) 2642C. A gladiolus of the utmost delicacy of coloring, the predominating hue being snowy white with a faint touch of cream in the throat and an exquisite flush or corona of cool rose pink at the edges of the petals. Up to 8 or 10 trimly tailored florets, about five inches in diameter and of very heavy substance open at a time on spikes up to five feet tall. A vigorous, easy grower that performs excellently with only average culture.

ROYAL STEWART (P.P. 1339) 2644C. The lightly ruffled florets are five inches in diameter and are of good substance. They are a clear light red and the long flowerheads frequently carry up to twelve flowers open at one time. Growth is vigorous and healthy, with the total height of the plants running about five feet. A truly remarkable new gladiolus variety acclaimed for its fine performances.

CARIBBEAN (P.A.F.) 2646C. The delicate blue tones of the exciting novelty present an unusual combination of rare blue-violet petals handsomely embellished by a rich, deep violet throat and a small cream spear. Caribbean opens from 9 to 11 precisely styled florets at one time in formal, double-row placement. It consistently produces tall, well-proportioned spikes and unusually healthy bulbs. It is the first distinctly ruffled blue-violet gladiolus.

IN-THE-ROW PLASTIC GREENHOUSE

Revolutionary New Plastic Product Protects Plants from Below-Freezing Temperatures

The revolutionary new plastic product for the home garden! This In-The-Row Plastic Greenhouse is complete, ready to use. It sets up quickly and easily, and can be used again year after year. You can use it to prolong the growing season in the fall, too! This specially made plastic covering, supported by wire wickets, admits the warmth of the sun, prevents damage from frost, wind and rain. It protects tender plants like petunias and tomatoes down to 25 degrees above zero. Just imagine the advantages of starting flowers and vegetables 1 to 2 months earlier in the spring.

Just plant seeds or set out the started plants, and cover with the In-The-Row Greenhouse. Covered plants really flourish; they grow faster and stronger; and they produce bigger flowers and better vegetables many weeks earlier. The fall season can be prolonged by covering late-started plantings with the In-The-Row Greenhouse. Flowers and vegetables can be grown to full maturity long after hard frosts have killed unprotected plants in the fall. Available in THREE SIZES, completely prefabricated and ready for immediate use.

EROSION & CHRISTMAS TREES

AT MONEY-SAVING PRICES

Plant These
Sturdy
Well-Rooted
Transplanted
Evergreens

Grow them in your garden for 2 or 3 years before transplanting to permanent landscape location. In a few years they will be worth many times what you paid for them. Use them to control soil erosion. Protect your topsoil. It is vital to continuous plant growth.

PYRAMIDAL ARBOR-VITAE. 1040C. Narrow, shapely, pyramidal form with green, fanlike foliage. Stands full sun.

GLOBE ARBOR-VITAE. 1030C. Globular evergreen. Broad fan shaped leaves.

SAVIN JUNIPER. 1014C. Spreading type Juniper. Dense dark green foliage.

PFITZER JUNIPER. 1012C. The favorite in low growing spreading evergreens.

Feathery green foliage is very attractive.

FASTIGIATA JUNIPER. 1010C. Tall, slender evergreen with silvery green foliage. A hardy and vigorous grower.

MUGHO PINE. 1050C. Dwarf pin-cushion pine with tufts of dark green pine needles.

SPREADING YEW. 1044C. Branches out from the bottom into a low-bush formation. Fine, glossy dark green foliage. Mature plants bear bright red yew berries.

UPRIGHT YEW. 1046C. The pyramidal type. Excellent for shade. Rich glossy green foliage remains attractive throughout the year.

HICKSI YEW. 1042C. Beautiful shrub-like evergreen of medium height, columnar in form, dense green foliage. Red berries in fall and winter.

Colorado
Blue
Spruce

COLORADO BLUE SPRUCE

1020C. One of the most beautiful and highly prized of all evergreens. Silvery blue-green foliage. Tall growing compact and perfectly shaped. Makes a fine specimen tree, but should be used with discretion in foundation planting. It also provides good contrast among other evergreens. Grows slowly, but well worth waiting for.

NORWAY SPRUCE

1022C. Fast growing, tall, stately trees. Dark green, thick, short needles. Most popular and extensively planted for outdoor living Christmas trees. Highly recommended for street and specimen planting. Also good for windbreaks.

DOUGLAS FIR

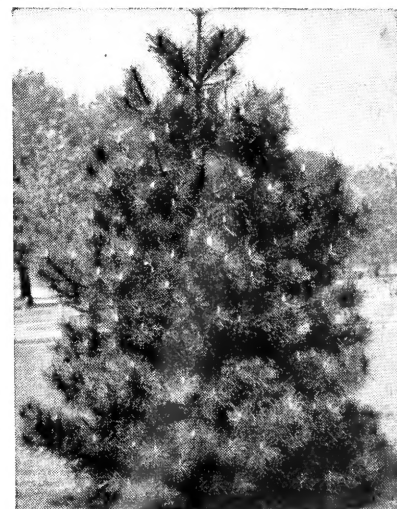

1053C. Highly ornamental. Grows in a shapely pyramidal form with beautiful blue-green foliage. Drooping 4½ inch cones add to the tree's attractiveness. Popular Christmas tree.

SCOTCH PINE

1052C. A decorative tree densely covered with dense blue-green needles of medium length. The pyramid form gives great character to the tree. Rapid in growth, very hardy. Used for windbreaks, screens, etc.

AUSTRIAN PINE

1048C. Here is one of the most dignified of the pine trees. Needles are straight and slender and 4 to 5 inches long. They are clustered in large tufts along the branches in such a manner as to form a very dense, compact, shapely tree.

SHADE TREES

Hardy & Enduring • Lifetime Enjoyment

SUGAR MAPLE

3954C. One of the most colorful shade trees. When young, it often grows with an oval head, later becoming pyramidal or bell-shaped. Makes a tall growth, about 60 to 75 feet at maturity. It is stately in all seasons, but most colorful in fall when its dense leaves are brilliant yellow, orange and scarlet. Widely used for tree lawns and ornamental planting. Extremely hardy and long-lived.

| | Each | 2 | 4 |

Wisteria Tree

Emlong's **BRILLIANT** **EVERBEARING STRAWBERRY**

(Plant Patent #1183). Emlong's sensational new Brilliant excels in growing, bearing, and taste tempting features. Where many varieties fail due to droughts or excessive rains, Brilliant will thrive and continue to produce its usual enormous crops. Being a product of the far North, the plants are very hardy and will succeed under most unusual handicaps. They are matchless in quality and flavor—rich and tangy but lacking in the acidity so common in Everbearers. The flesh is of firm texture; solid throughout, and red clear through.

Out of tests made with several new and many old everbearing varieties, Brilliant won all records for **BIG YIELD** and **PERFECT BERRIES**. Brilliant achieved the amazing production record of 7000 quarts per acre—2000 quarts more per acre than any other variety tested. A superior berry for every home use, and a real money-maker for the commercial grower.

PREMIER

265C. The best selling strawberry from coast to coast. It is one of the earliest berries to bear, yet resisting late spring frosts, thus bringing "first-of-the-season" high prices. Plants are thrifty, vigorous growers and make a good fruiting row. It starts to ripen early and continues bearing heavily for a long period. Berries are uniformly shaped, long, pointed in shape and bright scarlet-red, having a super-delicious sweet flavor. Withstands dry weather and matures full size crops under adverse conditions. Excellent shipping qualities.

DUNLAP

245C. Dependable midseason to late Strawberry which stands coldest and warmest climates and poorest soils. Plants are medium in size, long rooted, extremely vigorous, free from disease, and will make more plants than any other variety grown in the midwest. Berries are medium size, very dark red, and honey-sweet. Highly favored for preserving, jam, etc. Very productive.

ARMORE

235C. The growing commercial leader. The best bet for a late ripening strawberry. Armore produces more fruit of larger size and better color than any other of the new sorts. Flavor is sugar sweet. Berries are firm and solid. Excellent for fancy desserts, canning, freezing or jam. Don't delay, order today!

GEM (Everbearing)

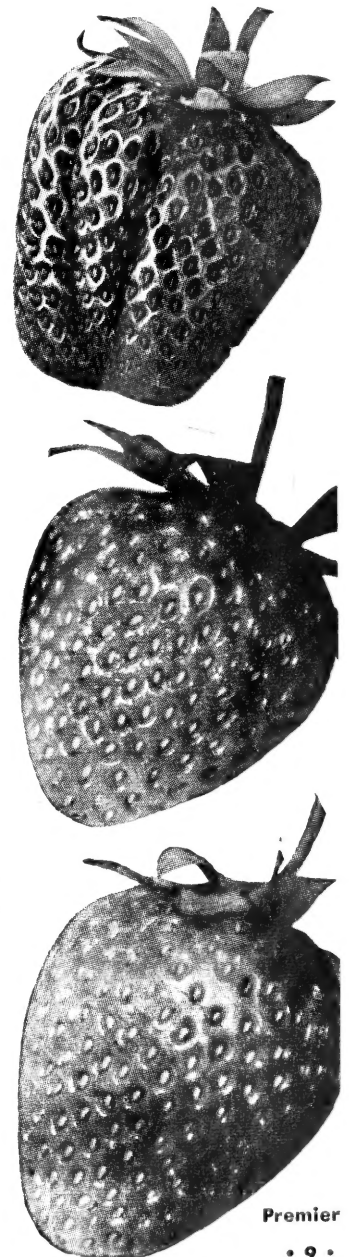

220C. Gem has proven itself to be one of the good, dependable older varieties of Everbearers. Developed here in the mid-west, it has proven itself in most all sections of the country. It is an excellent plant maker, and produces a heavy crop of excellent quality berries. Fruit is large, bright red in color and highly recommended for home garden use. Plant our heavy fruiting strain of Gem for a dependable everbearer.

ROBINSON

270C. One of the best mid-season to late berries—ripens 10 days to two weeks after Premier. Robinson is one of the largest berries grown, often 30 berries will fill a quart box. Fruit is extra-large, bright shiny red, conical in shape and well colored to the very center. Flavor is honey-sweet. A vigorous, healthy grower and very productive. It bears heavily over a long period. A favorite with commercial growers and a wonderful berry for canning and freezing purposes.

CATSKILL

240C. Catskill is excellent for freezing. One of the best mid-season to late varieties. Catskill is a cross between Premier and Marshall. It is a sure cropper as it ranks next to Premier in this respect. It rarely ever freezes out. Fruit is bright, shiny red. Plants make a fine, vigorous growth. Fruit is produced on long, thick stems making it easy to pick. An excellent berry for shipping and home use. Very hardy.

EMLONG NURSERIES ANNUAL PLANTING TIME SALE

Dwarf FULL SIZE FRUIT ON FRUIT TREES

DWARF APPLE TREES

Scott Emlong
age 7 years
and Dwarf
Apple Tree

Emlong's Dwarf Apple Trees are ideal for the grower with limited space. These small trees grow to the height of 8-12 feet. Although the trees are dwarf, the fruit is full sized. Enjoy this easy to pick fruit in your own yard. **Important**, plant with bud union 2 to 3 inches above the surface of the ground.

DWARF RED MCINTOSH. 620C. Bright red fruit, which is juicy and highly aromatic. Heavy bearing, fall ripening variety.

DWARF RED DUCHESS. 617C. Solid red summer apple. Fruit is large, striped red in color. A good eating apple, also excellent for pies and sauces.

DWARF MELBA. 619C. Early red apple, which ripens in mid-August. Practically the same quality and appearance as McIntosh; but ripens much earlier.

DWARF RED ASTRACHAN. 615C. An attractive apple, with fine grained flesh; crisp and juicy. Excellent cooking apple.

DWARF PEAR TREES

Bear full-sized, delicious fruit, the same as standard varieties. Ideal for the home garden and growers with limited space. Trees are very ornamental in spring with their abundance of creamy-white, fragrant blossoms. They seldom grow more than 6 to 10 feet tall.

DWARF SECKEL. 3614C. Called the Sugar Pear because of its sweet delicious flavor. Ripens late summer. Blight-resistant.

DWARF BARTLETT. 3612C. Fruit is large, juicy, highly flavored; yellow with a beautiful blush.

DWARF DUCHESS. 3612C. A greenish-yellow, spotted russet pear, with rich flavor. Trees are hardy, healthy and bear large crops.

DWARF CLAPP'S FAVORITE. 3615C. Golden yellow fruit, with red cheek. Fine texture, melting, sweet and juicy. Ripens in August.

DWARF OKA CHERRY

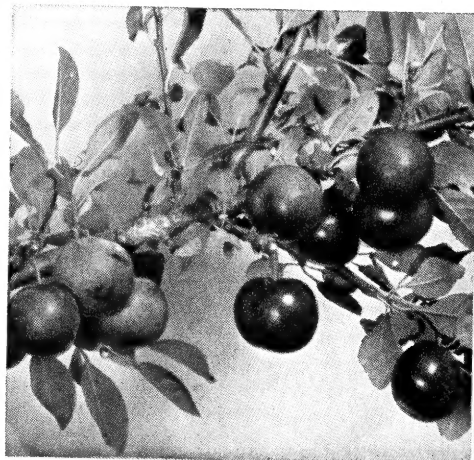

628C. This Hardy Hybrid Cherry Plum produces a full crop where other varieties fail. Fruit is dark purplish-red all the way through. Fruit is sweet and delicious for eating fresh, or for preserves. Trees are also very ornamental.

DWARF SAPA PLUM

626C. Tree is of dwarf habit but a rapid grower. Often starts to bear the year after planting. Trees are very ornamental in early spring when the branches are covered with shimmering white blossoms followed by an abundance of fruit. Fruit is red-fleshed, medium sized; deliciously sweet and juicy. Small freestone. Fruit is firm, good for canning, pies and shipping. Enormous cropper even in the coldest climates. Hardy in all sections. Plant two trees for best results.

EMLONG NURSERIES ANNUAL PLANTING TIME SALE

SAVE 50%

HARDY NORTHERN GROWN FRUIT TREES

We have a limited supply of smaller sizes in the popular varieties of hardy fruit trees, and are offering them at special sale prices.

HEAVY PRODUCING APPLE TREES

CORTLAND. 3004C. A McIntosh type apple, quick to bear and heavy yielding. Fruit is large, uniform in shape and size, rich red in color. Sub-acid.

RED DELICIOUS. 3006C. King of the winter eating apples. A very fine double red strain. Ripens in October and is an excellent commercial variety.

RED MCINTOSH. 3012C. Our own large fruiting strain of McIntosh is highly prized for its flavor and quality. Red apples; white flesh. Very juicy and highly aromatic. Heavy yielding. Ripens early fall.

RED JONATHAN. 3008C. Popular with commercial growers. Excellent flavor. Desirable for eating and cooking. Flesh crisp, and juicy.

GRIMES GOLDEN. 3010C. An outstanding yellow winter apple. Heavy bearing, excellent flavor and a good keeping variety.

RED NORTHERN SPY. 3002C. A solid red strain of the old Northern Spy. Apples are large, firm-fleshed and are unexcelled.

LODI. 3014C. Early yellow apple. Fruit is similar to Yellow Transparent but ripens a week later. Hardy and heavy producer.

| Special Sale Prices | Each | 2 | 5 | 10 | 25 |
|---------------------|-------|--------|--------|--------|---------|
| 2-3 ft. trees | \$.75 | \$1.45 | \$3.45 | \$6.50 | \$15.75 |

HARDY PLUM TREES

STANLEY PRUNE. 3402C. Sweetest Prune grown and bears the quickest. Freestone, ripens midseason, hardy and an excellent commercial variety. Yields heavily every year. Hardy and thrifty grower — self-pollenizer.

SUPERIOR. 3406C. Semi-Dwarf tree that bears at an early age. Wine-red skin covered with purple bloom. Yellow flesh, sweet, juicy and freestone. Very hardy in all sections. Very productive.

EUREKA. 3404C. The delicious flavor is a combination of Plum, Apricot and Peach. Known as the "Red Nectar" fruit because juice is red and sweet. Excellent for dessert and canning. Freestone.

| Special Sale Prices | Each | 2 | 5 | 10 | 25 |

NORTHERN GROWN PEACH TREES

RED HAVEN. 3314C. An extra early ripening, flaming scarlet peach. Firm fleshed, fine, sweet, golden yellow. Freestone.

HALEHAVEN. 3306C. Second only to Elberta in popularity and profit. Large, with deep orange skin and red blush. Colors long before ripe. Firm, juicy.

FAIRHAVEN. 3304C. Ripens a week before Halehaven. The perfect Haven type peach ideal for freezing. Bright golden color with red cheek.

ELBERTA. 3302C. The original strain. Still the world's standard by which all other peaches are judged. Need we say more?

KALHAVEN. 3316C. A perfect yellow freestone; same size and shape as Halehaven. Has a distinct rich juicy flavor of its own. Wonderful for shipping.

SUN HIGH. 3318C. A new introduction which has proven to be a good commercial yellow freestone ripening 15 days ahead of Elberta. Large size, roundish, thick-skinned, firm fleshed peach. Good shipper.

| Special Sale Price | Each | 2 | 5 | 10 | 25 | 50 | 100 |

| 2-3 ft. trees | .70 | 1.35 | 3.25 | 6.25 | 14.50 | 28.50 | 55.00 |

HEAVY BEARING CHERRY TREES

MONTMORENCY. 3102C. Regardless of where you live, Montmorency is the only profitable Sour Cherry to grow. Bright, red, large, round juicy fruit. Delicious sub-acid; good to eat fresh off the tree or canned. Makes wonderful pies and cider. Preferred by canners to all other sour varieties. Fruit has remarkable keeping qualities on the trees and after picked. Trees are self-pollenizing.

| Special Sale Prices | Each | 2 | 5 | 10 | 25 | 100 |
|-------------------------|-------|--------|--------|--------|---------|---------|

SWEET CHERRY TREES

BLACK GIANT. 3106C. Largest, blackest of the Sweet Cherries. Ripens late, keeps a long time on tree. Excellent shipper and canner. Bears annually.

WINDSOR. 3104C. Ripens late, prolonging your profits. Fruits are large, dark red in color. Wonderful keeper and shipper. Self-pollenizing.

SCHMIDT. 3108C. Ripens mid-season just before Windsor. Extra large, plump, and uniform in size. Extra firm. Hardy and prolific bearer.

| Special Sale Prices | Each | 2 | 5 | 10 | 25 |
|---------------------|-------|--------|--------|--------|---------|
| 1-2 ft. trees | \$.70 | \$1.35 | \$3.25 | \$6.25 | \$14.95 |

Bartlett

HARDY PEAR TREES

BARTLETT. 3202C. The favorite, both commercially and for home use. Large, waxen yellow with red blush. Ripens in September.

CLAPP'S FAVORITE. 3204C. Large fine textured pear resembling Bartlett. Ripens early. Pale yellow with red cheek, rich and juicy. Hardy and productive, especially where others fail.

BOSC. 3206C. Firm skin makes it a wonderful keeper unequalled as a dessert pear with its very firm, sweet white flesh.

SECKEL. 3208C. (Sugar Pear). Small size, yellow russet with bright red cheek. Flesh white, very juicy, buttery and excellent flavor. Vigorous grower and produces enormous crops each year.

AMERICAN HOLLY (*Ilex Opaca*) *At Special Bargain Prices*

1361C. AMERICAN HOLLY is, by far, the most popular of the Holly family. This Broadleaf Evergreen has glossy green leaves edged with spines and barbs, and bright red clusters of berries so familiar to all of us as Christmas Holly. It can be easily grown in most all sections of the country, if planted where it will have some protection from harsh winter winds. It will thrive in a natural shelter, such as on the leeward side of larger spruce or hemlock plantings, large shrub borders, or on the protected side of a home. Holly can be grown as individual specimens, in group plantings, or as a hedge. We are proud to offer for the first time these 10-12 in. seedlings at a popular low price. These are extremely nice quality plants that will enable you to start a Holly planting or hedge at a low price. All that is required for success is a well-enriched soil, well fortified with acid peat moss or leaf mold to keep it acid, and a location sheltered from harsh winter winds. Be the first in your community to establish a group planting or hedge of this fine Broadleaf Evergreen. Sex cannot be guaranteed on these sale priced 10-12 in. seedlings.

MOUNTAIN LAUREL Evergreen Foliage—Delightful Flowers

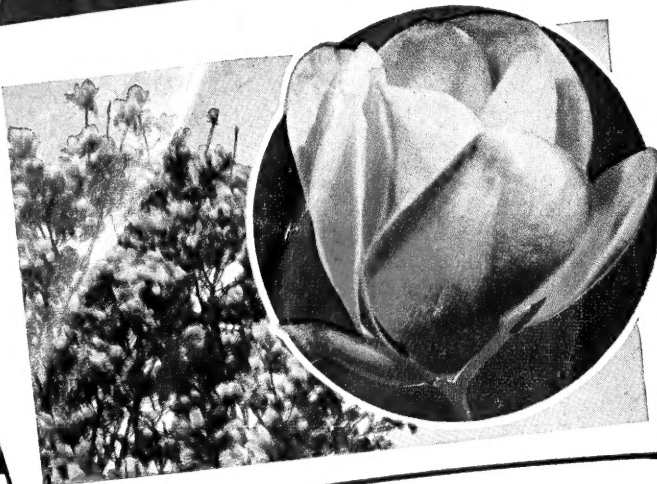

1391C. (*Kalmia latifolia*). Few lovelier shrubs exist than the Mountain Laurel, a member of the Rhododendron family. It has a smooth, waxy green foliage smaller and more refined than the Rhododendron. Huge bloom clusters of an unusual lavender pink shade appear in May and June. It matures into a shapely plant about 6 to 7 ft. in height. Requires the same acid soil conditions as Azaleas, Holly and Rhododendron; plant in combination with them as a foundation planting or in a shrub border. Little pruning is required except to control the shape of the plant. Thrives in full shade or partial sun. Plant where it will have some natural shelter from the harsh winter winds, such as on the leeward side of larger spruce or hemlock evergreens, or the protected side of the home.
